

Swiftcat 11.4m SFS (semi-foiling system)

Launched back in 2017, and carrying on from the success of the 9.6, Swiftcat decided to go bigger, improving on the great characteristic of the 9.6. This gives you even more space around the island wheelhouse for fishing or tourism or for more space internally, giving you a much more comfortable living space inside. We haven't compromised on quality and you will still get that Swiftcat smooth ride from the semi-foiling system, along with better fuel efficiency and speed.

LOA:	11.4m
Beam:	4.4m
Draught:	0.8m
