

Swiftcat 9.6 SFS (semi-foiling system)

Launched back in 2004, this model was the first Swiftcat boat to employ a semi-foiling system. This special feature is what gives Swiftcat boats the added speed, improved fuel consumption and the smooth ride that our customers have come to expect when they are out on the water. The island wheelhouse is perfect for fishing, giving you full access around the boat. The full width wheelhouse not only gives you the ability to fish from the stern boat but also gives you more living space internally.

LOA:	9.6m
